THE OFFICE ACTION DOES NOT MATCH THE COVER SHEET APPLICATION. THE OFFICE ACTION IS NOT DUR CASE.

CLAIRE NOEL 1<0 SA

Attachment(s)

- 1) X Notice of References Cited (PTO-892)
- 2) Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
 Paper No(s)/Mall Date ______.

| 4) | Interview Summary (PTO-413 |
|----|----------------------------|
| | Paner Nn/s\/Mail Date |

5) Notice of Informal Patent Application (PTO-152)

6) 🔲 Other: _

Office Action Summary

Part of Paper No./Mail Date 0204

* See the attached detailed Office action for a list of the certified copies not received.

Application/Control Number: 10/299,263

Art Unit: 1712

Page 2

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

704-586-7548

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-12 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Gallucci (6221556). The reference teaches an optical element obtained from a thermoplastic resin composition comprising polycarbonate and poly(cyclohexane-dimethanol cyclohexane-dicarboxylate) (PCCD) that has greater than 75% light transmittance. See the examples. The thermoplastic resin compositions comprising the same components as the thermoplastic resin compositions of the claims inherently have the required refractive index. See In re Best 195 USPQ 430 (CCPA 1977).

Claims 1-12 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over each of Scott (5942585) and Flora (4897453). Each of the references teaches clear film obtained from a thermoplastic resin composition comprising polycarbonate and a poly(cyclohexane-dimethanol cyclohexane-dicarboxylate). See examples in Scott and examples and claim 9 in Flora. The clear thermoplastic resin compositions comprising the same components as the thermoplastic resin compositions of the claims inherently have the required light transmittance and refractive index. See In re Best 195 USPQ 430 (CCPA 1977). The language "optical element" does not distinguish over the clear film of the references.
